Experience

Senior Business Analyst

Loom & Lantern Co., New York, NY

Jul 2021 – Present

- Spearhead enterprise-wide data analysis and reporting for 5 business units, identifying trends that improved revenue by 18% YoY.
- Built a real-time KPI dashboard used daily by 40+ executives, reducing report generation time from 3 days to 15 minutes.
- Led cross-functional team of 8 analysts to deliver a customer segmentation model that increased targeted marketing ROI by 35%.
- Developed predictive churn models using logistic regression, saving \$1.2M annually in customer retention costs.

Business Analyst

Willow & Wren Ltd., New York, NY

Aug 2017 – May 2021

- Analyzed and interpreted datasets of 10M+ records to identify business opportunities and recommend process improvements, leading to a 20% reduction in operational costs.
- Created detailed financial models and dashboards to track KPIs, enabling data-driven decision-making across departments.
- Worked closely with product managers to define requirements and translate business needs into technical specifications.
- Automated 12 recurring manual reports using Python and SQL, freeing 25 hours per week of analyst capacity.

Junior Data Analyst

Meridian Analytics Group, Boston, MA

Jun 2014 – Jul 2017

- Supported senior analysts in building forecasting models for retail and consumer goods clients.
- Designed and maintained ETL pipelines processing 500K+ daily transactions from multiple data sources.
- Conducted A/B testing analyses for marketing campaigns, contributing to a 12% uplift in conversion rates.

Analytics Intern

Beacon Strategy Partners, Boston, MA

Jan 2014 – May 2014

- Assisted in competitive landscape analysis for Fortune 500 clients using Tableau and Excel pivot tables.
- Compiled and cleaned survey data from 2,000+ respondents, preparing datasets for statistical analysis.

Education

Master of Science in Business Analytics

Columbia University, New York, NY

2019 – 2021

GPA 3.9 / 4.0 — Dean's List, Graduate Analytics Fellowship recipient

Bachelor of Science in Economics

New York University, New York, NY

2010 – 2014

Magna Cum Laude — Minor in Statistics, President of Data Science Club

Projects

Enterprise KPI Dashboard Platform

Designed and deployed a company-wide analytics dashboard serving 200+ users across 5 departments.

- Integrated data from Salesforce, SAP, and internal APIs into a unified data warehouse.
- Reduced executive reporting cycle from weekly to real-time, enabling faster strategic decisions.
- Won internal Innovation Award for most impactful technology initiative of 2023.

Customer Churn Prediction Engine

Built an ML pipeline to predict at-risk customers 90 days before churn with 87% accuracy.

- Trained logistic regression and gradient boosting models on 3 years of behavioral data.
- Integrated predictions into CRM workflows, enabling proactive retention outreach.
- Saved \$1.2M in annual revenue through targeted intervention campaigns.

Automated Financial Reporting Suite

Replaced 12 manual Excel-based reports with an automated Python pipeline.

- Designed modular report templates with parameterized SQL queries and Jinja2 rendering.
- Deployed on AWS Lambda with scheduled triggers, delivering reports to Slack and email.
- Freed 25+ hours per week of analyst time, redirected toward strategic initiatives.
